

CISBAT International Conference 4-6 September 2019

Your Software presentation in the framework of the poster exhibition

In order to offer the best possible conditions for your presentation, the following infrastructure will be put at your disposal:

- one table, two chairs and a display panel for poster size DIN A0
- a 220 V connection
- an internet connection

You will need to supply:

- your computer and screen
- cables, connectors etc.

The official presentation of your software will take place during the relevant poster session, however, you may also want to present it at other moments.

As your stand will be located in an open hall, we advise you not to leave your hardware unattended; you will have the possibility to leave it with the reception desk, which will be occupied continuously. EPFL and the CISBAT organisers will not be liable for any material that is stolen or damaged.

We kindly ask you to prepare

- a poster to be displayed upon your arrival on the first conference day
- a paper of up to 6 pages to be sent to us before **15 May 2019**, according to the corresponding layout instructions

The paper template and poster layout guidelines are available for download from www.cisbat.org.

Should a last minute problem keep you from attending the conference, kindly inform us as soon as you know, so that the reserved space can be used in a different way. Thank you in advance.

*If you have any queries, please do not hesitate to contact the conference manager, Barbara Smith:
cisbat@epfl.ch.*
